### What's New In?

Conflicted Copy Pro is the ultimate solution to handle hard disk errors caused by Dropbox and to avoid losing information. This add-in allows you to check the version of the file stored in Dropbox and then compare it with the latest version on your hard disk. If the version on your hard disk is different from the one in Dropbox you can choose which one to keep; you can also keep both, you can cancel your plan to save your data, or you can change the target folder in which you want to save the copied version of the file. Additionally you can keep the original file in Dropbox if you want to. Conflicted Copy Pro also helps you to avoid overwriting files accidentally, because when you edit a document and press Enter you are asked whether you want to save the last version on your hard disk. Conflicted Copy Pro Features: - Support for Microsoft Office 2010, 2013 and 2016 - Support for Windows 7 and later versions - Support for Google Drive - Support for Dropbox - and online accounts supported by Dropbox like Google, Microsoft, Yahoo and Facebook - Easy to use and install by adding a toolbar button - Freely customizable - Multiple languages supported - Automatically remove files from the "My Windows" folders, prevent from being overwritten - Support for Windows Network shares - Automatic updating software - Files version checker - Statistics - Many more... This add-in is intended to help you to analyze and copy multiple files simultaneously from your hard disk or cloud storage. Unlike other tools, it does not rely on helper programs as it is written in the COM+ framework and works directly. Files are copied by the driver. You can copy to different locations or copy to a network share. You can choose to overwrite the backup (if available) or to keep it. The program can monitor the progress of the backups and resume them if interrupted. The add-in is tested on Windows 7 and later and is compatible with all versions of Microsoft Office 2010 and 2012 and is compatible with the recent Microsoft Office. Files are copied to the Clipboard which supports most formats. This add-in works with Dropbox, Google Drive, Microsoft SkyDrive, Amazon, OneDrive, FTP, SFTP, Windows Network Shares, and with some offline editors. The add-in also supports FAT32 and NTFS-formatted drives. It is compatible with both 32 and 64 bits Windows operating systems. Features:
