gen with full support for multiple snapshot and incremental backups. Best for you all the best! Thank you and keep supporting. Automatic backup is implemented! The program can now automatically backup each file or folder that was created on your computer. In addition to that you can specify a time interval between the backups. It works very well and it's no more a hassle to set it up as it was before. You have to register with your email address and choose a password to use and the backup will be started automatically. After that you just have to specify a time interval between the backups. A reminder will be sent automatically by email. In the next update the program will tell you exactly which files were found and which were missed. It's a very easy to use tool that you should not be without it. And as always: keep supporting this program. Automatic backup is implemented! The program can now automatically backup each file or folder that was created on your computer. Oncologic outcomes of primary breast reconstruction with or without plastic surgery fellow participation: a retrospective study. Although breast reconstruction is considered as an important component of breast cancer care, little is known about the effect of a plastic surgery fellow participation on the oncologic outcomes of immediate breast reconstruction. This study aimed to compare the oncologic outcomes of primary breast reconstruction between plastic surgery fellows and faculty surgeons and to examine the impact of plastic surgery fellows' participation on the oncologic outcomes of immediate breast reconstruction. This retrospective cohort study enrolled 3076 patients with stage 0-II breast cancer who underwent immediate breast reconstruction between January 2000 and December 2012. Patients were divided into the following two groups: (i) plastic surgery fellows performed immediate breast reconstruction (PSF group) and (ii) plastic surgery faculty surgeons performed immediate breast reconstruction (FS group). The cancer recurrence rate was defined as local recurrence, regional recurrence, distant recurrence, and death from 82157476af
